A Ceramic Renaissance: Clay and Sculptural Works at Frieze Los Angeles 2023
February 2, 2023

From groundbreaking works by Italian master Lucio Fontana to LA-based Sophie Wahlquist's immersive installation in clay, artworks at this year's fair reflect a resurgence of ceramic in the art world.

Representing Los Angeles's rich history of artists working with clay and a resurgence of ceramic in the wider art world, this year's fair will feature an international roster of artists producing clay works, using the medium to explore themes of spirituality, femininity and the environment. Highlights include:

Jane Margarete, Chase a Rainbow, 2022, ceramics and glaze, 74" x 43" x 5"

A solo presentation of ceramic sculptures by Filipino American artist Jane Margarete. Continuing the artist's explorations of strength, protection, sensuality, and captivity, the presentation will centre on a large butterfly shaped lock with four different 'repaired' wings (Anat Ebgi, Los Angeles, Focus).
